WORK EXPERIENCE - 5.5 years

Pegasystems   March. 2022 – Present
Front End Developer

- Built and enhanced a workflow design component for the Pega Launchpad tool that reduced workflow configuration time by 30% for clients and made accessibility improvements.
- Worked on 15+ presentation components, created multi-variant stories for them in Storybook, and was responsible for reviewing designs and translating them to pixel-perfect accessible React UI components adding to the growing list of components in the Pega Constellation UI library.
- Developed a UI feature that allows clients to test data source connections and integrate data seamlessly into applications. This enhanced the data source integration experience and improved workflow efficiency.
- Streamlined and restructured the Redux store for a few feature modules, optimizing the application's state management and efficiency.
- Written several unit tests for owning components, achieving 90%+ coverage, and developed Playwright end-to-end tests for feature validation. These efforts enhanced feature robustness and stability
- Initiated and led a bug triaging process that streamlined bug resolution, reducing the team's bug count and incident inflow by 50%. This proactive approach improved response times and system stability.

Infosys   May 2019 – March 2022
Specialist Programmer (Full Stack Developer) | *July 2021 – March 2022*

- Developed multiple UI pages for a migration platform, enabling clients to upload code files, execute various migration programs, and view migration results.
- Integrated feature add-ons into the application, increasing the exposure of product offerings.

System Engineer Specialist | *May 2019 – July 2021*

- Designed and implemented a comprehensive admin dashboard end to end, delivering detailed insights to clients for improved data visibility and decision-making.

SKILLS & INTERESTS

- **Web Technologies and Frameworks:** React JS, Redux, HTML, CSS, Node JS, Express JS.
- **Languages:** Javascript, TypeScript, Java, Python.
- **Testing:** React Testing Library, Jest, Playwright.
- **Tools:** Git, Figma, Github, Docker, Postman, Bitbucket, Storybook.
- **Interests**: Travelling, Gaming, F1 Racing, Music.

Projects

Glassmorphism UI   - Tech Stack: Angular, HTML, CSS, Typescript   GitHub

- Glassmorphism UI is an interactive web app that allows users to customize transparent, blurred background effects(glass effects) and generate the corresponding CSS code. The platform enables real-time experimentation with glass morphism design elements.

Password Generator - Tech Stack: HTML, CSS, SASS, Javascript   GitHub

- A password generator app with an intuitive UI, allowing users to customize character inclusion and visualize generated password strength based on its content.

EDUCATION

Raghu Engineering College   2019 May
Bachelor of Technology, Computer Science And Engineering   Visakhapatnam
